p_3	█	█	█							
$\vdots$										
p_{10}	█	█	█	█	█	█	█	█	█	█

Receiver

Force-answer mode

$\langle \text{think} \rangle p_k \langle / \text{think} \rangle$

answer directly from prefix

Receiver

Free-generation mode

$\langle \text{think} \rangle p_k$

continue reasoning and then answer

AIME f_x

Question: A stack of n tokens lies before them. The players take turns with Alice going first. On each turn, the player removes 1 token or 4 tokens from the stack. The player who removes the last token wins. Find the number of positive integers n less than or equal to 2024 such that there is a strategy that guarantees that Bob wins, regardless of Alice's moves.

Prefix with correct answer: ... So total losing positions: $404+405=809$. But wait ...

Free-generation first time correct

Force-answer first time correct

answer first appears: 809
